Professional Experience:

Agile Business Analyst – Lunn Consulting **Present – May 2023**

Responsibilities:

- Produced thorough Product requirement document (RPD), use cases, and functional specifications to direct software development teams in providing solutions that are in line with business goals.
- To ensure that projects were implemented and delivered successfully, I worked closely with cross-functional teams that included developers, testers, and project managers.
- Oversaw projects for process improvement, pointing out inefficiencies and suggesting improved workflows to boost operational effectiveness and customer satisfaction.

Worked with UX/UI designers to develop user-friendly and intuitive user interfaces for websites and mobile applications.

To guarantee a seamless adoption of new systems, we conducted user acceptability testing (UAT) and led user training sessions.

Business Analyst – Sycom Integrated Solutions LTD **[illegible]**

Responsibilities:

- Elicited functional requirements through engagement with SME's and stakeholders.
- Validated and prioritized requirements facilitating workshops with stakeholders.
- Carried out extensive industry-based research market research, feasibility studies, risk assessments, SWOT analysis, GAP analysis, and competitor analysis to create a justifiable business case.

- Collaborated with colleagues to determine areas of improvement, review departmental performance, and develop ideas for better service to customers.
- Presented quarterly reports to executive management detailing the performance and success of the team and implementation of new policy.

Business Development Officer – Climax Inspection Service. January 2020 - December 2020

Responsibilities:

- Conducted market research and analysis to identify potential clients and business opportunities.
- Developed and implemented strategic business development plans to expand the company's customer base.
- Cultivated and maintained relationships with existing clients, fostering loyalty, and maximizing sales opportunities.
- Prepared and delivered persuasive sales presentations to key decision-makers.
- Collaborated with internal teams to ensure smooth onboarding of new clients.

Chemical Laboratory Analyst - Giolee Global Resources. January 2017 - November 2018

Responsibilities:

- Conducted chemical analysis on various samples using established laboratory procedures and protocols of ISO17025.
- Prepared and maintained accurate documentation of test results and data analysis.
- Collaborated with cross-functional teams to troubleshoot issues and resolve technical problems.
- Ensured compliance with safety protocols and maintained a clean and organized laboratory environment.
- Participated in quality control processes to uphold high standards of accuracy and precision.
- Developed and maintained a contamination profile to monitor clean-up progress using sample results.
- Coordinated with the site assessment team to receive samples, conduct analysis, and report on contamination levels.
- Investigated the effects of environmental pollutants on a contaminated site by analysing the physicochemical parameters on soil, water, and plant samples.
- Produced sample data summaries.
- Identified and resolved project impediments and escalated when necessary.
- Communicated analysis results to clients and stakeholders.
- Prepared contamination profile for each site to support the site remediation team.
- Lead laboratory quality and safety initiatives.
